

# NEVER RUN OUT OF FEED AGAIN

with GrainSure silo monitoring

**GrainSure** combines rugged on-silo sensors with intelligent software to deliver smarter feed management.

- Real-time feed levels at a glance
- User-defined alerts and notifications
- Accurate days-to-empty forecasts
- Average daily consumption tracking
- Customisable feed schedules
- Optional shared access for feed suppliers

## **Simple, safe and reliable feed management**

### **Never run out of feed**

Avoid costly drops in milk production.

### **Stay safe**

No more risky climbs or manual checks.

### **Save time**

Check silo levels anytime, anywhere.

### **Stress free ordering**

Avoid costly, last minute orders with automated alerts.

### **Everyone in the know**

Share access so the whole team stays informed.

### **Smarter planning**

Track usage and forecast demand.

# GrainSure

GrainSure gives farmers and feed suppliers a shared view of silo levels, so everyone can plan with confidence. With real-time visibility, ordering becomes proactive, deliveries become smoother, and feed-outs become a thing of the past.

A more transparent feed supply chain builds trust, reduces emergency drops, and strengthens the relationship between farmers and their feed partners.
